# Key Programming Software Update compatible with Ford*
# FIRST AFTERMARKET SOLUTION IN THE WORLD
## ADS2269 - Code D753712AD

### October 2023

**Advanced Diagnostics is pleased to announce an update of the ADS2269 key programming software compatible with Ford* to include many new applications.**

## What does the software do?

The software is the first solution worldwide to program both bladed and proximity keys for Ford* even when the alarm is active and in a situation of lost keys. The software also includes an add key function. Transponder and remote are programmed at the same time. No additional cables or software are required, but the Smart Pro must be connected to the internet. The procedure requires 2 tokens: one for server access/authentication and one for key programming. With a UTP plan, both key programming and server access are included in the UTP subscription.

Note: This software does not alter the vehicle firmware, making it a safer solution compared to others available on the market.

## What else is needed?

An internet connection is required.

**Smart Pro**
